Professional Summary

Final-year Bachelor of Science in Information Technology student with hands-on experience building secure full-stack applications and performing vulnerability analysis. Proficient in Python, Java, and modern web technologies, with a strong foundation in backend development, API security, and cloud fundamentals. Seeking graduate opportunities in software development or cybersecurity.

Experience

MWR Cybersec Cyber Security Virtual Intern	Mar 2026 – Present Remote
--	------------------------------

- Conducted vulnerability assessments and identified security risks in simulated environments.
- Performed penetration testing exercises to analyze attack vectors and system weaknesses.
- Recommended mitigation strategies aligned with industry security best practices.
- Applied network security principles to understand and prevent cyber threats.

First in Business Solutions Service Desk Agent	Feb 2025 – Oct 2025 Strydompark
--	------------------------------------

- Resolved 30+ technical support tickets weekly, improving user productivity and system uptime.
- Managed user accounts, permissions, and access control using Active Directory.
- Delivered first-line support for hardware, software, and network-related issues.
- Assisted in system upgrades and infrastructure improvements.

Jumping Bean Technical Test Analyst Intern	Jan 2024 – Jan 2025 Randburg
--	---------------------------------

- Designed and executed manual and automated test cases to improve software quality.
- Conducted regression and functional testing across multiple releases.
- Identified and tracked defects, improving issue resolution turnaround time.
- Created user documentation to enhance usability and onboarding.

Projects

Student Expense Tracker (Secure Full-Stack Application)

Spring Boot, React, PostgreSQL, Docker

- Developed a secure full-stack application with JWT authentication and role-based access control.
- Built RESTful APIs for managing expenses, categories, and user dashboards.
- Implemented input validation, rate limiting, and BCrypt password hashing to enhance security.
- Designed a responsive React frontend with real-time data updates and CRUD functionality.
- Containerized the application using Docker for consistent local development and deployment.

Vulnerability Scanner (Security Tool)

Python, Socket Programming, Nmap

- Built a vulnerability scanner to detect open ports and basic web security misconfigurations.
- Identified missing HTTP security headers and potential SQL error exposure indicators.
- Integrated optional Nmap support for enhanced network scanning capabilities.
- Generated structured reports (JSON and TXT) with risk classification (Low, Medium, High).
- Designed a simple GUI interface to improve usability.

Weather Dashboard

HTML, CSS, JavaScript, REST API

- Developed a responsive dashboard displaying real-time weather data using external APIs.
- Implemented dynamic UI updates and interactive features for improved user experience.

Technical Skills

Languages: Python, Java, C++, JavaScript, SQL, HTML/CSS

Tools: GitHub, VS Code, Eclipse, Android Studio, Jenkins, Docker

Technologies: Linux, JUnit, PostgreSQL, REST APIs, Google Cloud Platform

Cybersecurity: Network Security, Vulnerability Analysis, Basic Penetration Testing, Secure Coding

Certifications

- CompTIA A+
- Microsoft Azure Fundamentals (AZ-900)
