Professional Summary

Final-year Bachelor of Science in Information Technology student with experience in technical support, software testing, and software development. Proficient in Python, Java, and web technologies, with foundational knowledge in cybersecurity and cloud computing. Certified in CompTIA A+ and Microsoft Azure Fundamentals. Seeking graduate opportunities in software development, cybersecurity, or IT support.

Education

Richfield Graduate Institute of Technology

Bachelor of Science in Information Technology
Johannesburg, Gauteng

Final Year

Relevant Coursework

- Machine Learning
- Java Programming
- Cybersecurity
- Operating Systems
- Mobile App Development
- Algorithms

Experience

MWR Cybersec

Cyber Security Virtual Intern

Mar 2026 – Present
Remote

- Completed hands-on labs in threat detection and vulnerability analysis.
- Performed simulated penetration testing to identify system vulnerabilities.
- Analyzed security risks and proposed mitigation strategies.
- Applied network security principles to understand cyberattack techniques.

First in Business Solutions

Service Desk Agent

Feb 2025 – Oct 2025
Strydompark

- Provided desktop and technical support to end users, resolving hardware and software issues.
- Managed user accounts, permissions, and access control using Active Directory.
- Delivered first-line application and network support in a fast-paced environment.
- Supported IT infrastructure upgrades and system rollouts.

Jumping Bean

Technical Test Analyst Intern

Jan 2024 – Jan 2025
Randburg

- Designed and executed manual and automated test cases.
- Assisted in functional and regression testing processes.
- Identified, reported, and tracked software defects using testing tools.
- Created user documentation and training materials for end users.

Projects

Campus Marketplace

HTML, CSS, JavaScript, REST API

- Developed a full-stack marketplace platform enabling product listing and management.
- Integrated RESTful APIs for efficient product data handling.
- Designed a responsive and user-friendly interface.

Expense Tracker

Python, PyQt6, SQLite

- Built a desktop application to track and manage personal expenses.
- Implemented dynamic calculations for real-time expense tracking.
- Designed an interactive GUI with tables, forms, and dropdown menus.

Weather Dashboard

HTML, CSS, JavaScript, REST API

- Developed a responsive dashboard displaying real-time weather data.
- Integrated external APIs to fetch live weather information.
- Implemented dynamic UI updates and interactive features.

Technical Skills

Languages: Python, Java, C++, JavaScript, SQL, HTML/CSS

Tools: GitHub, VS Code, Eclipse, Android Studio, Jenkins

Technologies: Linux, JUnit, Google Cloud Platform, REST APIs

Cybersecurity: Network Security, Vulnerability Analysis, Basic Penetration Testing

Certifications

- CompTIA A+
- Microsoft Azure Fundamentals (AZ-900)
